

Rio-Therm

Conventional façade-mounted air-conditioning unit

High air circulation, with draughts in the neck and shoulder area, cold feet and clearly audible air noise.

Rio-Therm

No noticeable or audible air movement in the vicinity. Air flows only along the window.

Example: Basler & Hofman Ingenieure

Rio-Therm | Environmentally friendly wall-mounted unit. The Rio-Therm wall gadget unites the high power density of a circulation-cooling unit with the comfort of quiet cooling. The heating and cooling performance can be individually regulated. The result is a healthy and pleasant room climate with minimal energy requirement

- Rio-Therm combines the excellent power spectrum of a circulating air cooling device with the comfort of no-noise cooling – minimal energy requirement
- Individual control of heating and cooling output
- Circulating air operations guarantee fast and efficient heating and cooling
- Draught and noise-free user experience at the workspace
- Integrated fresh air supply channel
- Practical cable duct for high and low voltage power lines
